Made in Denmark: For the first time *ever*, this miniature icon of 20th century design is being offered and with permission from **Fritz Hansen A/S** *. The shell is hand-made and the upholstery is hand-sewn, just like the full-size Egg Chair. The whole process takes several hours to complete. The miniature Egg is in fact an exact replica of the full-size Egg, featuring a strikingly organically shaped up - holstered seat on a slender metal base. All made in Denmark – except cross foot.

* **1:6 DESIGN** has the permission from Fritz Hansen A/S to produce all Arne Jacobsen furniture design. **1:6 DESIGN** and **Fritz Hansen A/S** work closely together while developing miniature chairs.
