

ERIK MAGNUSSEN DESIGNS PIONEERING LOUNGE CHAIR

One of Denmark's leading designers, Erik Magnussen, has created the Yoga lounge chair for the Clauser collection.

The Yoga chair is uniquely created from a single piece of steel. Erik Magnussen has worked on this technique to perfection for many years. "I have worked with the idea since the early 1970's, but it is not until now that I am completely satisfied with the chair", says the designer. The result is a quality chair with a very modern look. The construction, with its long formed tube, ensures comfortable seating and many years of durability at a reasonable price. These qualities have always been very important throughout Erik Magnussen's successful career.

Erik Magnussen:

Erik Magnussen was educated at the Danish School of Arts and Crafts in 1960. He has proved himself as one of the world's most important designers throughout the last 40 years. He is well-known in Denmark for his Stelton vacuum jug, but his work ranges from porcelain for Bing & Grøndal to door handles and lamps, to furniture for among others Fritz Hansen and Morten Engelbrecht. He has received several Danish and international design prizes and his products are on exhibit at museums throughout the world.

The Yoga series:

The Yoga chair is the first part of Clauser's series of lounge furniture, which also includes a designer table and pouf by Erik Magnussen. The design of the Yoga chair makes it a pleasure to sit in whether at home or while taking a short break in public.

"I have chosen to work with Clauser because they always produced high quality products and they are pleased with what they do. This means a lot to me and the finished chair", says Erik Magnussen.
